

DIGITAL DESIGNER

WILL YOU LIFT OUR DESIGN TO THE NEXT LEVEL?

Are you looking for more creative freedom? Do you consider variation to be the best way to develop your skills as a designer? Are you eager to work on meaningful projects of clients with a mission? Then join us at Unc Inc as a Digital Designer.

WHO WE ARE

Money makes the world go round, they say. But life revolves around more than that. With creativity and technology we can improve the world in all respects. That's why we design and build digital products with our partners and end-users that add positive impact to financial rewards. Platforms, apps, websites, everything we make must be beautiful, inspiring, functional and future-proof. Therefore our best work is for the goals we believe in.

WHAT YOU'LL BE DOING

You will work on very multiple projects, in a small, self-managing and multidisciplinary team. The work you'll do will be very diverse; from UI/UX design to brand design, your sense of aesthetics will be manifested in many shapes. You will have a lot of responsibility and will sometimes communicate directly with the customer, if you like. You'll get the opportunity to develop and share your knowledge with us, as we will do with you. This way we'll learn from each other, from the projects we do, every day.

WHO YOU MIGHT BE

You have a strong portfolio in digital and are able to challenge the UI/UX designer, as he will challenge you. That way you'll help each other to create the best possible work. Equally important as the quality of your designs, is the ability to present your work. Using your communicative skills you're able to engage your team and client with your story, thus substantiating your choices and convincing them of your ideas. You handle feedback well and can implement it accordingly. Your profession is as much a job as it is a hobby; you're obsessed with design that is both functional and beautiful and collect the best examples for personal inspiration. You're skilled at using Sketch, Photoshop, InDesign and Illustrator, always designing to the smallest detail. You're senior so you can work autonomously, have a strong sense of responsibility and aren't hesitant to take initiative. You have at least five years of relevant work experience and are ambitious and dedicated to creating great work. But above all, you're sociable and a good laugh.

WHAT WE HAVE TO OFFER

We offer you a fulfilling job of four to five days per week with a good salary. In a young, close-knit and friendly team you work on cool projects for non-profits, start-ups, and other initiatives. In addition to the positive impact, we also select work on the technical challenge it provides us. Coding for sensors, beacons and Internet of Things are just a few examples of this. We also do autonomous projects like The Coffee Copter as a means of playing around and learning new things. You will also have the opportunity to gain knowledge and inspiration on courses and events. And then there's our monthly 'Eve of Inspiration' where we share the things that inspire us.

WHERE WE ARE LOCATED

Our beautiful and spacious office is located at a small shipyard on the NDSM wharf. Surrounded by water, nice bars and all sorts of events, we offer a working environment that provides plenty of room for creativity and inspiration.

GETTING EXCITED?

Send your resume and motivation to jobs@uncinc.nl. Better yet, respond through [LinkedIn](#) (don't forget the motivation), and we'll reply within a week.
