

FRONT-END DEVELOPER

WANT TO BE AT THE FOREFRONT OF OUR DEV. TEAM?

Would you rather own than just execute? Do you prefer a technical challenge over an easy job? Are you eager to work on meaningful projects of clients with a mission? Then join us at Unc Inc as a front-end developer.

WHO ARE WE?

Money makes the world go round, they say. But life revolves around more than that. With creativity and technology we can improve the world in all respects. That's why we design and build digital products with our partners and end-users that add positive impact to financial rewards. Platforms, apps, websites, everything we make must be beautiful, inspiring, functional and future-proof. Therefore our best work is for the goals we believe in.

WHAT YOU'LL BE DOING

You will work on very diverse projects, in a small, self-managing and multidisciplinary team. You will have a lot of responsibility and will sometimes communicate directly with the customer, if you like. You'll get the opportunity to develop and share your knowledge with us, as we will do with you. This way we'll learn from each other, from the projects we do, every day.

WHO YOU MIGHT BE

You have an eye for design and are able to challenge the UI/UX designer, as he will challenge you. That way you'll help each other to create the best possible work. Your profession is as much a job as it is a hobby; you're simply obsessed with writing beautiful code and are an avid follower of new developments in your field. You're confident building responsive designs and doing, cross-browser development. You have experience with HTML5, CSS3, SASS & LESS and Javascript (React, ES6, jQuery. Webpack and Babel are beneficial). You also like to apply principles like Gitflow and experience with Twig template engine and Zeplin is beneficial. You're skilled at debugging so experience with tools like XHProf or Xdebug is beneficial. You have at least two years of relevant work experience and are ambitious and dedicated to creating great work. Furthermore you have a strong sense of responsibility and are not hesitant to take initiative. Above all, you're sociable and a good laugh.

WHAT WE OFFER

We offer you a fulfilling job of four to five days per week with a good salary. In a young, close-knit and friendly team you work on cool projects for non-profits, start-ups, and other initiatives. In addition to the positive impact, we also select work on the technical challenge it provides us. Coding for sensors, beacons and Internet of Things are just a few examples of this. We also do autonomous projects like The Coffee Copter as a means of playing around and learning new things. You will also have the opportunity to gain knowledge and inspiration on courses and events. And then there's our monthly 'Eve of Inspiration' where we share the things that inspire us.

WHERE WE ARE LOCATED

Our beautiful and spacious office is located at a small shipyard on the NDSM wharf. Surrounded by water, nice bars and all sorts of events, we offer a working environment that provides plenty of room for creativity and inspiration.

GETTING EXCITED?

Send your resume and motivation to jobs@uncinc.nl. Better yet, respond through LinkedIn (don't forget the motivation), and we'll reply within a week.
